DIGNITAS TECHNOLOGIES

Dignitas' agile and responsive solutions target DoD requirements in Modeling, Simulation, and Training (MS&T). We deliver innovative system and software technologies to solve our customers' complex challenges.

Core Competencies

Live, Virtual, Constructive (LVC)
MS&T systems, mission command systems

Geospatial
Modeling, database generation, correlation, analysis

3D Modeling and Visualization
3D models and animations, 2D/3D visualization solutions

Mixed Reality Solutions
Augmented and virtual reality for collaboration, training, mission rehearsal

Cyber Training and Security
LVC cyber training, cyber range support, cybersecurity of systems

Machine Learning and Data Science
Deep learning, computer vision, data analytics

Learning Systems and Solutions
Adaptive training with an intelligent tutor. Courseware at IMI Levels 1-4.

Research and Development
Innovations designed to solve complex challenges

Contracts & Experience

SeaPort NxG, GSA MAS, AFLCMC, Oasis SB, SBIR Phase III

Army
Army LVC IA, DIL, NCRC EOPS, STE TSS / TSMT / RVCT / SVT / OWT, CCTT, AVCATT, CDT, SE Core, GTS, CPM Next, JLCCTC, OneSAF

Air Force
Air Force F35 Training, AETC

SOCOM
SOCOM GICSA, Fed Co Pro

Marines
Marines ECS MATOC, ITE, CCS

Navy
Navy ACTS, NCSM, ERDE, MRTS, LCS

Differentiators

- Experts supporting complex LVC systems and architectures
- Technology innovators with successful transition of R&D to acquisition programs
- Flexible and responsive approach, experienced leadership and workforce, and competitive rates
- CMMI Maturity Level 3 appraised Agile and DevSecOps processes
